

PERPETUAL INTELLIGENCE

pi-cli

The most flexible cross-platform framework for building modern CLI terminals.

[pi-cli](#) is the most flexible cross-platform framework for building modern CLI terminals for your company, product, service, SaaS, development, and testing needs. Users, customers, and enterprises across engineering, manufacturing, technology, artificial intelligence, machine learning, finance, media, creative design, etc., can create simple CLI apps with few flags or advanced CLIs with roots, groups, sub-commands, arguments, and options.
